

December 18, 1991

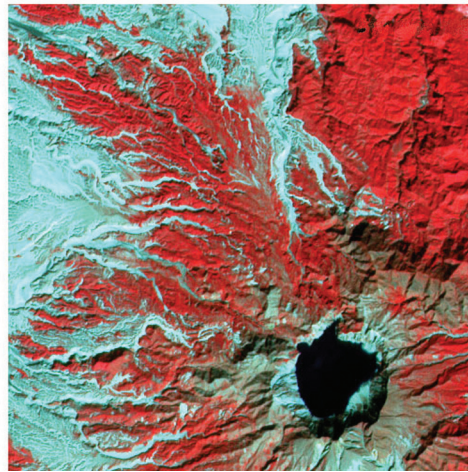

December 11, 1994

February 12, 1996

December 5, 1998

Time sequence showing the rate of growth of vegetation to the northwest of the summit of Mt. Pinatubo. Images were obtained on December 18, 1991; December 11, 1994; February 12, 1996, and December 5, 1998. The summit crater is at the lower right of each view and vegetation is indicated by red in this false-color image. (Data obtained from the SPOT satellite.)
